RODNEY MONITOR SUPPORT ARM

Unlike earlier monitor support arms Rodney has been simplified so that there is no need for a separate arm and a post, instead the two components have been designed into one single piece.

As well as the aesthetic simplicity this brings to the product it also has superior logistical benefits: Rodney requires a lot less packaging and less material is used in the product's manufacture.

With desk clamp included, integrated cable management and security features as standard the product is ready to install and use immediately with no add-ons required.
